

Quality Policy

Seiche Water Technology Group Ltd is committed to delivering innovative and dependable products and services that consistently meet customer expectations and applicable requirements. We shall maintain our ISO 9001 quality management system to support reliable performance, customer satisfaction, and operational excellence across the Group.

We shall:

1. Understand and meet customer expectations, applicable requirements, and agreed commitments.
2. Comply with all applicable legislation and other relevant requirements.
3. Establish and review quality objectives that drive continual improvement.
4. Improve the effectiveness of our processes, with a focus on performance, consistency, and value.
5. Develop the competence and awareness of our people.
6. Control our suppliers and contractors to ensure they support our quality standards.
7. Monitor performance through appropriate measures, including feedback, audits, nonconformities, corrective actions, and opportunities for improvement.
8. Learn from mistakes, manage nonconformities effectively, and take timely corrective action.
9. Create and maintain documented processes, policies, and procedures appropriate to our business.
10. Support a culture of professionalism, accountability, collaboration, and continual improvement.

This policy provides the framework for setting quality objectives and supporting our continual improvement in delivery across the offshore energy, construction, utilities, marine science and defence sectors.

A handwritten signature in blue ink that reads "Roy Wyatt".

Roy Wyatt,
Chairman
