Environmental Policy

Seiche Water Technology Group Ltd is committed to deliver environmental solutions, protecting the environment, reducing ecological risk, and continually improving our environmental performance across the Group. We shall maintain our ISO 14001 environmental management system to prevent pollution, minimise environmental impact, and support responsible and sustainable business practices.

We shall:

1. Comply with all applicable legal and other requirements.
2. Identify and assess our environmental aspects and impacts, including those associated with our products, services, and operations.
3. Consider climate change risks and opportunities in our environmental management decisions.
4. Set environmental objectives and targets that support continual improvement and reduced environmental impact.
5. Seek to reduce emissions, energy use, waste generation, and resource consumption through efficient working practices and improved design, planning, and logistics.
6. Promote responsible waste management, including prevention, reuse, recycling, and lawful disposal.
7. Encourage an environmentally aware culture through training, awareness, and leadership.
8. Review environmental performance and reporting data, including nonconformities, incidents, and opportunities for improvement.
9. Evaluate suppliers and contractors based on their ability to support our environmental commitments.

This policy provides the framework for setting environmental objectives and supporting our continual improvement in environmental performance across the offshore energy, construction, utilities, marine science and defence sectors.

Roy Wyatt,
Chairman
